## Lorance Creek Natural Area Bird List

Lorance Creek Natural Area is owned and managed by the Arkansas Natural Heritage Commission, who first purchased the land in 1990. Located at a meeting point of the Coastal Plain and the Mississippi Alluvial Plain, this Natural Area provides a unique environment of pine-hardwood forest, sandy washes, and bald-cypress/tupelo swamp within a network of streams. There is an ADA-compliant paved foot trail and boardwalk into the swamp. Restrooms are available at the trailhead.

Prothonotary Warbler - Photographed by Sarah Morris

NAME:		
TIME:	DATE:	

## KEY

Season

- Y = Yearly Species seen in this area throughout the year.
- S = Summer Species typically only present as a breeding species during summer months (May-August).
- W = Winter Species typically only present during non-breeding season (November-March).
- M = Migrant Species passes through the area during spring (March-May) and/or fall (August-October) migration.

## Abundance

- C = Common Expected to be seen on most trips.
- UC = Uncommon Expected to be seen on some trips.
- R = Rare Seen very infrequently and/or may be reported from a rare, vagrant record.

**UPDATED: JUNE 2025** 

Development of this list was supported by the Arkansas Audubon Society.
