

### Spoons!

A simple multi-purpose instrument.

The Spoons can help provide a rhythmic element to any music style. To create this unique instrument, just take look in your own kitchen drawer.

**Step 1)** Find a pair of spoons. A bigger spoon can have a louder sound. Find something that is comfortable to your size hand.

**Step 2)** Face the spoons away from one another.

**Step3)** Put one finger between the spoons, holding the spoons lightly/securely in one hand.

**Step 4)** Hit one of the spoons on your upper thigh or the palm of your free hand. In moving back and forth between the two, you can create a rhythm.

**Step 5) Only for Experts.** Try running the spoons down the fingers of free hand. Or tapping a beat in odd places.

**Step 6)** Make a video or snap a photo of your skills and share with the Museum.
