Description

Located on West James Street at the point where it crosses the Missouri-Pacific Railroad line (approximately two blocks east of State Highway 365), the West James Street Overpass is of the wooden trestle bridge type. It consists of a total of six spans, the longest of which measures 22 feet. Its total length is 131 feet, with a deck width of 20 feet and an overall width of 26.5 feet. The abutments are a combination of wood and concrete, and the piers are timber resting upon concrete bases. The deck material is timber. The balustrade is constructed of concrete pillar uprights with metal pipe railings.

-----------------	-----------------	--

Significance

Constructed in 1924, the West James Street Overpass is associated with the Arkansas Highway and Transportation Era historic context and is of the timber wooden trestle type. Though the identity of its original designer does not survive, it was constructed in conjunction with the Arkansas State Highway Commission and thus may well have been designed by one of that state agency's engineers. Given its relatively intact condition it retains sufficient integrity to remain associated with its historic period and is thus locally eligible under Criterion C.
