___ See continuation sheet.

Verbal Boundary Description: ___ See continuation sheet.

Beginning at a point on the southern edge of Forest Service Road #38A located approximately 14,000 feet west of Bench Mark 1323.3, proceed northerly along a line running parallel with the fire tower's western elevation for a distance of 200 feet; thence proceed easterly along a line running parallel with the fire tower's northern elevation for a distance of 200 feet; thence proceed southerly along a line running parallel with the fire tower's eastern elevation for a distance of 200 feet; thence proceed westerly along a line running parallel with the fire tower's southern elevation to the point of beginning.

Boundary Justification: ___ See continuation sheet.

This boundary includes all the property historically associated with this resource, including the fire tower itself and the land surrounding it that was cleared for its construction and view of the forest around Tall Peak.

Section number 7 Page 1

Description:

The Tall Peak Fire Tower is located southeast of Mena on Forest Service Road No. 38A in Polk County. The tower is a two story, field stone and wood structure built on a continuous stone foundation. The first level is made of field stone and each corner has the distinctive inward-sloping corners peculiar to CCC construction. The first level consists of a single room that has two small, stationary windows on the west and south sides and a single door on the east side. The north side of the structure has an external stairway leading to the second level of the structure. The second level of the structure has a porch which extends around the east, south, and west sides of the structure with a plywood balustrade. The second floor has a one room observation deck which has four windows on each side except on the west side which has three windows and a door. There are no coverings for these windows and no trace of original material used for the windows. The structure is topped with a pyramidal roof covered with composition shingles. The structure has had some vandalism and some repairs done to it but is in a deteriorated state at present.

**National Register of Historic Places
Continuation Sheet**

Section number 8 Page 1

The Tall Peak Fire Tower was constructed circa 1938 by members of the 742nd Company of the Arkansas CCC District stationed at the Mena Camp that was located approximately eight miles to the northwest, near the small town of Shady. It was constructed to function as a fire and observation tower to help prevent the forest fires that heretofore had ravaged the forest with devastating effect. As such, the Tall Peak Fire Tower remains significant through its associations with the contributions to American social history made by the Civilian Conservation Corps, its associations with the emphasis upon conservation of our natural resources that was the original mandate of the CCC, and its status as an excellent example of the more functional CCC architecture in a remarkable state of preservation.
