Verbal Boundary Description: See continuation sheet.
Beginning at the eastern corner of High and Cherry Streets, proceed southeasterly along the northern curbline of High Street to the intersection with a line formed by, yet ten feet from, the southeastern elevation of the outbuilding. Then proceed northeast along said line to the intersection with a line formed by, yet ten feet from, the northeastern elevation of the outbuilding. Then proceed northwest along said line to the intersection with the eastern curbline of Cherry Street. Then proceed southwest along the curbline to the point of beginning.

This boundary includes all of the property historically associated with this resource that retains its integrity, including the house, outbuilding, and the concrete retaining walls.

Boundary Justification: ____ See continuation sheet.

Summary

The Leslie-Rolen House is a one-and-a-half story, wood-frame residence constructed in 1907 in the Plain Traditional style. Essentially square in plan, the house is covered by a hipped roof with three projecting cross gables and three gabled dormers. The exterior remains basically intact; however, the interior has been altered somewhat. There is one associated outbuilding, a gable-roof storage shed, located near the eastern corner of the house. A deteriorated concrete retaining wall on two sides of the house is also included in the nomination. Located at the eastern corner of High and Cherry Streets in Leslie, the Leslie-Rolen House is in good condition.

Elaboration

Constructed in 1907, the Leslie-Rolen House is a one-and-a-half story, wood-frame residence designed in the Plain Traditional style. Although basically square in plan, the house was designed with a simplified Queen Anne roofline that consists of three cross gables (which project slightly) and three gabled dormers extending from the basic hipped roof, which is currently covered with composition shingles. The frame walls rest upon a continuous foundation of rusticated concrete block and brick and are sheathed with white-painted simple drop novelty siding. Two interior brick chimneys and one nonhistoric exterior stone chimney punctuate the roofline.

The front, or southwestern, elevation consists of a projecting gable-end bay to the south and a shed-roofed porch along the remainder of this elevation. A large eighteen-over-one double-hung window dominated the first-story of the projecting gable-end bay. In the gable end, a pair of conventional one-over-one double-hung windows reside between the jigsawn ornamented cornice returns. Due to the slope of the landscape, the porch is several feet above ground and is accessed by concrete steps. The porch roof is supported by five turned-spindle posts, another sign of Queen Anne/Folk Victorian-style influence. Underneath the porch, there are two single-leaf wood doors with one entering into the projecting gable room. An eighteen-over-one window provides the only fenestration of that wall area. Above the shed roof, an inset gabled dormer with a one-over-one window projects from the roofline. The dormer duplicates the cornice return trim found on the larger projecting gable bay and is otherwise similar except on a smaller scale.

The northwestern elevation is composed a projecting gable-end bay at the southwestern end that is identical to its front elevation counterpart and an equal-length wall that is fenestrated

by a single one-over-one double-hung window. This elevation also contains a gabled dormer (all three dormers are identical in composition) to the north of the projecting gable.

On the rear, or northeastern, elevation, the projecting-gable bay is positioned in the center. Fenestration on this bay is reversed from the other two bays by having a pair of conventional one-over-one windows on the first story and a single one-over-one in the gable end. A nonhistoric exterior stone chimney is located to the north, and to the south, an apparent enclosed inset porch with a single-leaf entrance. An inset dormer is also located to the south of the center gable bay.

A projecting-gable bay identical to the one on the northeastern elevation is placed to the east of center on the southeastern elevation. To the east of this bay is the short side wall of the enclosed inset porch. A small aluminum-frame two-over-two window has been installed here. The longer room to the north of the projecting-gable bay is lighted by a large one-over-one window.

The interior has been altered somewhat; however, most of the oak and walnut woodwork remains intact.

There is one contributing outbuilding located near the eastern corner of the house. that may have originally been used as a smokehouse. Clad with drop siding (and some false-bevel novelty siding on the northeast elevation) and covered by a gable roof, the outbuilding presents a dignified appearance through the use of enclosed eaves and a wide frieze band with returns.

Also included in the nomination is a concrete retaining wall along High and Cherry Streets that has deteriorated considerably.

Significance

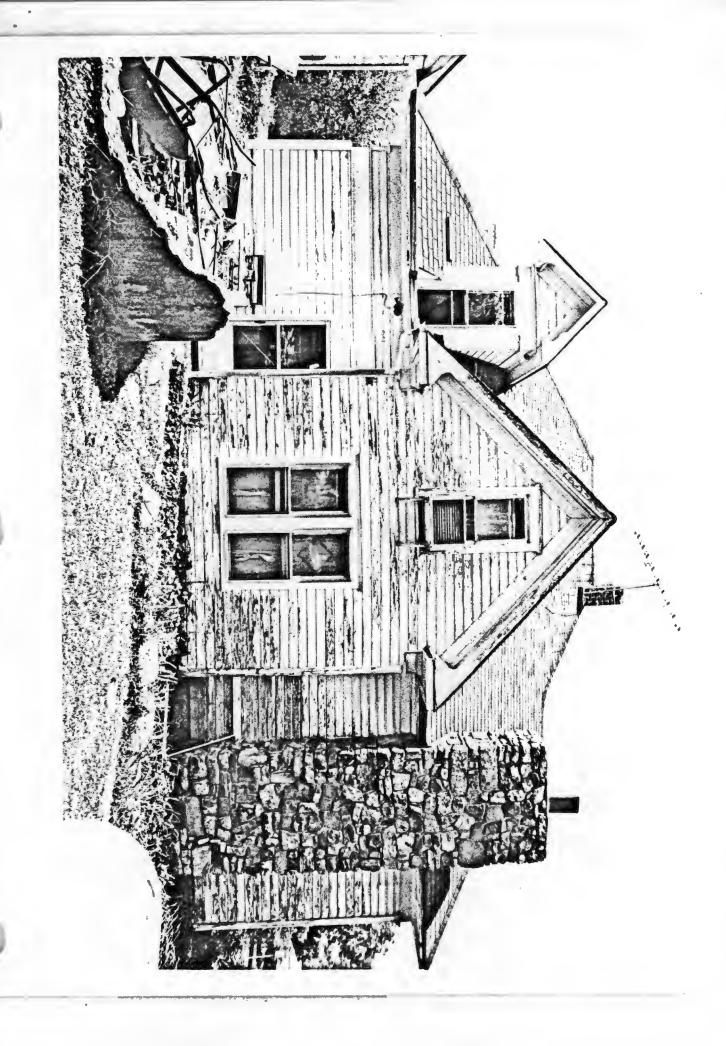

The Leslie-Rolen House was constructed as a residential building on High Street near downtown Leslie. It was built by Mr. Sam Leslie for he and his wife, though the local oral history holds that she did not like the house, and so he built her another. Its construction date of 1907 and its simple Plain Traditional style represent the historic context Searcy County History, 1865-1910: Reconstruction, Railroads and Renewal. As noted in this context, this was a period of county-wide growth and prosperity, relatively speaking, and thus a period during which there was much new immigration and new construction. The community of Leslie, with its lumber manufacturing and its propitious location on the Missouri and North Arkansas Railroad, looked forward to many years of growth and prosperity. With its traditional "L"-shaped floor plan and minimal "high-style" touches as the turned posts on the porch, the Leslie-Rolen House is thus eligible with local significance under Criterion C as an excellent and well-preserved example of this ostensibly plain but nevertheless representative residential style in Leslie during this period.
