## United States Department of the Interior National Park Service

# National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in *Guidelines for Completing National Register Forms* (National Register Bulletin 16). Complete each Item by marking "x" in the appropriate box or by entering the requested information, if an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

### Description

The Smyrna Methodist Church is a single story, gable roof, wood frame, vernacular Greek Revival church building with an enclosed gable foyer on the southern elevation and a central, narrow red brick chimney rising through the ridge. It is sheathed in weatherboard and imbricated shingles, covered with a metal roof and supported by a fieldstone foundation.

This simple structure is one bay wide by three bays long. The southern elevation features the gable roof entrance foyer, which is decorated with imbricated shingles in the pediment and accessed by a pair of flush plank doors. Each side of the foyer is lighted with four-over-four wood sash windows. The pediment above is also decorated with imbricated shingles and jig-sawn verge details cut into various vegetal patterns. The eastern and western elevations are virtually identical, being punctuated only by three evenly-spaced nine-over-nine wood sash windows. The northern elevation is blank.

The alterations to the building are limited to the late nineteenth century replacement of the original central, side-gable entrance with the end gable foyer and the addition (at the same time) of the imbricated shingle and jig-sawn verge details on both the foyer and the gable pediments of the southern elevation. The interior features some minor improvements but is largely intact.

The Smyrna Methodist Church is in good condition.

Significance

Criterion C, local significance

The Smyrna Methodist Church (Part E, Historic Context #2) survives as the most intact example in White County of this simple vernacular interpretation of the Greek Revival which was so popular during the mid-nineteenth century. The early settlers of the county erected these simple but elegant structures for the purpose of sheltering their religious ceremonies throughout Arkansas during this time and later, but the Smyrna Methodist Church is by far the most intact surviving example of this style and construction from this or any other period of White County's history.

## United States Department of the Interior National Park Service

# National Register of Historic Places Continuation Sheet

Section	number	10	Page	1
<b>VOUINI</b>	IIMIIIMA		, ago	

Acreage of property: Less than one

### Verbal Boundary Description:

Beginning at a point formed by the intersection of the southern edge of State Highway 36 with a perpendicular line running parallel to the western elevation of the church and located 50 feet to the west thereof, proceed southerly along said line for a distance of approximately 200 feet to a point formed by its intersection with a perpendicular line running parallel to the southern elevation of the building; thence proceed easterly along said line for a distance of approximately 200 feet to a point formed by its intersection with a perpendicular line running parallel to the eastern elevation of the church; thence proceed northerly for a distance of approximately 200 feet along said line to a point formed by its intersection with a perpendicular line running along the southern edge of State Highway 36; thence proceed westerly for a distance of approximately 200 feet along said line to the point of beginning.

### Boundary Justification:

The original lot has been subdivided during the non-historic period, resulting in an indefinite current lot boundary; therefore, this boundary includes all the property historically associated with this resource that retains its integrity.
