### United States Department of the Interior National Park Service

## **National Register of Historic Places Registration** Form

This form is for use in nominating or requesting determinations of eligibility for individual properties or districts. See instructions in Guidelines for Completing National Register Forms (National Register Bulletin 16). Complete each item by marking "x" in the appropriate box or by entering the requested information. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, styles, materials, and areas of significance, enter only the categories and subcategories listed in the instructions. For additional space use continuation sheets (Form 10-900a). Type all entries.

## National Register of Historic Places Continuation Sheet

Section number \_7\_\_\_ Page \_1\_\_\_

#### Description

The J.A. Neaville House is a one-and-one-half story, wood frame Craftsman residence which was built around an 1899 vernacular, single story, gable roof residence. Its gable roof design shelters an essentially rectangular plan. It features a single, broad, exterior brick chimney at the end of one of its rear gable projections. It is covered with composition shingles, is clad in weatherboards, and rests upon a continuous brick foundation.

The southern or front elevation is composed of four evenly-spaced doghouse dormers in the side of the gable roof, each lighted with an eight-pane fixed window, and an enclosed, screened porch on the first floor with two entries.

The eastern elevation features the screened porch to the south and a gable end which is fenestrated with one-over-one and three-over-one wood sash windows. One of the projecting northern ells is flush with this wall and is lighted with a fixed four-pane window. The western gable end is also lighted with a variety of wood sash windows, several of which are also covered with metal awnings.

The northern elevation is similar to the southern elevation in that it features three evenlyspaced dormers which are identical to those on the opposite elevation. However, two gable roof ells project from this wall, both of which have had western sheds added. The first floor fenestration is all of early twentieth century vintage (one-over-one, single fixed pane) with the exception of the windows in the end of the original, 1899 gable roof section. Two six-over-six wood sash windows flank the stepped chimney.

The J.A. Neaville House has suffered only the enclosing of the original rear porch and some additional screening of the front porch; otherwise it is unaltered and in good condition.

#### Acreage of property: Less than one

UTM References:

A 15/623520/3887440

Verbal Boundary Description:

Beginning at the point formed by the intersection of a line running along the eastern edge of State Highway 385 with a perpendicular line running parallel to the southern elevation of the building and located 50 feet to the south thereof, proceed easterly along said line for a distance of approximately 200 feet to the point formed by its intersection with a perpendicular line running parallel to the eastern elevation of the building; thence proceed northerly along said line for a distance of approximately 200 feet to a point formed by its intersection with a perpendicular line running parallel to the northern elevation of the building; thence proceed westerly for a distance of approximately 200 feet along said line to its intersection with a perpendicular line running along the eastern edge of State Highway 385; thence proceed southerly for a distance of approximately 200 feet along said line to the point of beginning.

#### **Boundary Justification:**

The original lot has been subdivided during the non-historic period, resulting in an indefinite current lot boundary; therefore, this boundary includes all the property historically associated with this resource that retains its integrity.
